

# Fannin Innovation Studio

# Entrepreneurship Fellow Program

## Currently seeking applications!

### TWO-YEAR, FULL-TIME FELLOWSHIP

Our Entrepreneurship Fellow Program is a 2-year, full-time interdisciplinary leadership program designed to support and develop future leaders in life science commercialization. The program provides innovative scientists with the skills and relationships required for managing successful early-stage life sciences companies through experiential learning. During the 2-year program, fellows will receive compensation based on the NIH postdoctoral fellow stipend levels and will have the opportunity to:

- Gain real-world experience in entrepreneurship and life science development
- Manage R&D activities, intellectual property, business development, regulatory affairs, and financing of one or more of Fannin's therapeutics or device portfolio companies
- Participate in our Fellow Development Program designed to complement the experiential learning activities
- Build a network of biomedical entrepreneurs and other industry professionals
- Attend industry workshops and conferences

### FELLOWSHIP REQUIREMENTS

Applicants must have experience, or an interest, in life science research, clinical care, or life science commercialization and be authorized to work lawfully in the United States for the duration of the fellowship. A master's degree or PhD in an engineering field or a PhD/MD/PharmD (or equivalent) in a biological or related field is highly desirable.

### HOW TO APPLY

Interested individuals should submit a 2-page CV/resume and a 1-page statement of interest to Serena Miggins at [serena@fannininnovation.com](mailto:serena@fannininnovation.com). Please put 2017 Spring Entrepreneurship Fellow Application as the subject of the email.

Applications must be received by **midnight,**  
**Monday, November 28, 2016.**
