

Fannin Innovation Studio

Entrepreneurship Fellowship Program

Currently seeking applications for device projects!

TWO-YEAR, FULL-TIME FELLOWSHIP

Our Entrepreneurship Fellowship Program is a 2-year, full-time interdisciplinary leadership program designed to support and develop future leaders in life science commercialization. The program provides innovative scientists and engineers with the skills and relationships required for managing successful early-stage life sciences companies through a combination of experiential and didactic learning. During the 2-year program, fellows receive compensation based on the NIH postdoctoral fellow stipend levels and have the opportunity to:

- Gain real-world experience in entrepreneurship and life science development
- Manage R&D activities, intellectual property, business development, regulatory affairs, and financing of one or more of Fannin's life sciences technologies, with a focus on medical devices
- Participate in our Fellow Development Program designed to complement the experiential learning activities
- Build a network of biomedical entrepreneurs and other industry professionals
- Attend industry workshops and conferences

FELLOWSHIP REQUIREMENTS

The ideal candidate should possess a MS or PhD in Bioengineering or related engineering field and have an interest in medical device research and development, clinical care, or life science commercialization. Applicants must be authorized to work lawfully in the United States for the duration of the fellowship.

HOW TO APPLY

Interested individuals should submit a 2-page CV/resume and a 1-page statement of interest to Serena Miggins at serena@fannininnovation.com. Please put 2017 Fall Entrepreneurship Fellowship Application as the subject of the email.

Applications must be received by **midnight,**
Monday, October 2, 2017.
