

Looking for an Internship?

Do you want to...

Gain hands-on experience with early-stage life science commercialization?

Help advance the development of a cutting edge biomedical technology company?

Contribute positively to the growing life science ecosystem here in Houston?

Apply for the Fannin Internship Program!

Who we are:

Fannin Innovation Studio is dedicated to commercializing exciting technologies developed at the Texas Medical Center. We manage a rapidly growing portfolio of biomedical technologies including drug, device, and diagnostic startups.

Interns are a critical part of Fannin and make real contributions to our portfolio projects with active support and mentorship from Fannin staff. Roles might include helping advance product development, finding new applications for existing technology, assessing potential markets, designing and testing new medical devices, or identifying new company opportunities.

Become a part of a vibrant startup culture, and gain exposure to early-stage biomedical commercialization across a broad portfolio of technologies!

Who we are looking for:

- Postdocs, late-stage graduate/medical students, clinical fellows, or other professionals interested in exploring the biomedical startup world.
- Able to commit to 10-15 hours/week for 3 months (stipend provided for those legally authorized to work in the US).

What you need to do:

To request an application packet or for questions, email Serena Miggins at serena@fannininnovation.com

We have a **rolling deadline**. We are ready when you are!

Leading the Business of Life Sciences
